

Anthony J Farr

“Where Passion Meets Work”

3737 Saint John’s Bluff Rd, Jacksonville, FL 32224 | (904) 349-0625 | Farr433@bellsouth.net | AnthonyJoelFarr.com

Objective

- To drive optimum business outcomes via business processes and technology while continuing to challenge myself and others to learn and improve education.

B.S | 12/12/2014 | UNIVERSITY OF NORTH FLORIDA

- Major: Information Systems
- Minor: Business Administration
- Related coursework: 1st place in School of Computing Symposium

Skills & Abilities

DEVELOPMENT

· PHP	· .NET	· JAVA	· HTML 5/CSS 3
· Object Oriented	· Laravel (PHP framework)	· JQUERY/AJAX	· Google Charts
· Login Portal	· MVC Architecture	· UML and Design	· Hashing/Security Practices
· Agile Development	· Waterfall	· SCRUM	· Use Cases
· Javascript	· Blade Templating	· Coupling and Cohesion	· Best Security Practices

DATABASE

· MYSQL/SQL Server	· Entity-relationship	· Crow’s Foot Notation	· Data Integrity/Design
· Stored Procedures	· DB Triggers	· Data Manipulation	· Data Analysis
· Data Modeling	· ER Diagrams	· Data Normalization	· Migration and Seeding

BUDGET MANAGEMENT

· Sales/Costs Forecasts	· Flux/Comparisons	· Deviation Analysis	· Smoothing with Trend
· MS Office Expert	· Process Capability	· Scheduling	· Labor/Costs tracking
· Vendor Relations	· Process Management	· ROI Decisions	· Company Turnover

INFORMATION TECHNOLOGY

· VoIP Phone System	· Troubleshooting	· Network Design	· Disaster Recovery
· PoS system design	· Firewall/Security	· Port Forwarding	· DVR/NVR Surveillance
· Remote Assistance	· Data Backup Design	· Mobile Devices (BYOD)	· Phone Repair

Experience

IS/IT MANAGER | JASZ GROUP | 2012 – CURRENT

- Extreme Loyalty - 1st job and have been advancing since 16 (Cook/Cashier -> Hospitality Coordinator -> Assistant Manager -> Information Systems Manager)
- Made all financial decisions regarding technology (Software and Hardware Purchases)
- Personally upgraded all store POS systems from XP to 7 and provided on-call support
- Developed backup systems to ensure business operation flow and sales.

PROGRAMMING

- Design->Develop->Implement an ERP system for internal use via web applications using PHP, MYSQL, Laravel framework (MVC, OOP, Migrations), HTML5/CSS3 for responsive, jQuery, Ajax, Google charts and etc.
- Design->Develop->Implement databases utilizing MySQL and developing custom hashing algorithms
- Sole developer of application using a combination of the iterative and agile development methodologies
- Implemented a message board used by hundreds of internal employees with over 13,000 posts

INFORMATION TECHNOLOGY SUPPORT

- Responsible for all IT, troubleshooting and expansion plans for over eight stores
- Maintain PCI compliance utilizing Fortinet firewalls (strict port maintenance and website/traffic filters)
- Configured DVR and NVR security camera systems for remote viewing using DNS, port forwarding and the internet
- Recovered over \$5,000 worth of data in credit cards within first month that was previously deemed unrecoverable.

Business

- Developed sales and cost forecasting algorithms (used for ordering and schedule creation)
- Tracked store and employee performance
- Analyzed data (flux, variations, standard error and much more)
- Frequently interacted with partner vendors and was point of contact for anything IT related
- Very efficient communication skills with the ability to clearly explain complex processes
- Experience with Six Sigma and ROI calculations
- Was instrumental in aligning IT assets and projects to the strategic vision of the company

ASSISTANT MANAGER | JASZ GROUP | 2008 - 2012

- Trained and managed employees with a focus on company values and expectations
- Managed and held accountable for weekly payroll, food costs, sales, team scheduling and more
- Passed out of state franchise certification test with highest score in the company
- Established an employee of the month fund to drive employee work performance and excitement

Side Projects/Work

UNIVERSITY OF NORTH FLORIDA SYMPOSIUM

- For our symposium project I lead a group of four developers where we produced an intake system for Trinity Rescue Mission (A homeless shelter in downtown Jacksonville) with reporting.
- Developed experience in meeting an unknown client, hearing out the problems and then developing solutions around the issues. Provided in depth documentation with use cases and database structures
- Successfully integrated a fingerprint reader into our web application which eliminated the issue of fake names
- Provided the ability to track the number of intakes daily, find trends/seasons and reports for tax purposes
- Utilized RESTful architecture for an eloquent client-server integration with jQuery, AJAX and web services
- Won first place in the symposium competing with projects utilizing Google glass and other cutting-edge technologies
